

**NATURAL FLAVOR QUESTIONNAIRE - NOP (US), COR (Canada), (EC) No 889/2008 (EU), LPO (Mexico)**

This form must be completed for all non-organic natural flavors used in products requested for certification under the above noted organic standards. Note that QAI may request additional information as needed to verify compliance.

Natural Flavor Name and FEMA Number on Technical Data Sheet:

ISOBUTYRIC ACID, Natural

2222

Supplier Company Name and Address: Aurochemicals, 7 Nicoll St, Washingtonville, NY 10992

Type of flavor (select one or more as necessary):

<input type="checkbox"/> Protein Hydrolysate	<input type="checkbox"/> Extracts	<input type="checkbox"/> Essential oil
<input type="checkbox"/> Compounded flavor	<input type="checkbox"/> Oleoresin	<input type="checkbox"/> Isolate
<input type="checkbox"/> Distillate	<input type="checkbox"/> Compounded WONF	<input checked="" type="checkbox"/> Other (Single Flavor Chemical)

**A. Natural Flavor Compliance Information**

1. Which regulatory body or regulation does the natural flavor and all its flavor constituents comply with?

- FDA (US)       CFIA (Canada)       European Commission (EU)       Codex Alimentarius Commission (Mexico)

2. Can the material legally be labeled as a "natural flavor" per the applicable regulatory body?       Yes       No

3. Is the material only formulated for flavoring purposes (no nutritional use or other functions)?       Yes       No

8. Do the flavoring agent(s) in this material only consist of substances that do not impart a specific characteristic flavor, such as non-flavor ingredients, adjuvants and detail the function they serve in the flavor.  Yes  No

9. If glycerin is used as a carrier or solvent, please provide its organic certificate or a completed QAI Non-Organic (Monk Fruit) derived products, Thaumatin, Glycosylated Steviol Glycosides, or similar the response should be Yes  No  Attached

Material Compliance Questionnaire to Detail its manufacturing process.  Attached  N/A

10. Alternatively, if this Natural Flavor is to be used in a product certified under COR, is the glycerin from vegetable or animal fats and/or oils and produced using fermentation or hydrolysis?  Yes  No  Attached  N/A

11. If Yes, attach documentation detailing the maximum usage rate for the overall flavor material to qualify as a natural flavor.  Yes  No  Attached  N/A

12. If Yes, list solvent(s)/extraction material(s) used in the production of this Natural Flavor. If alcohol/ethanol is used, list any carrier system(s) used in this Natural Flavor.  Yes  No  Attached  N/A

6. If this natural flavor consists of a Natural Flavoring Agent that must be declared by its common or usual name on the product label, list the agent here:  N/A

Allowed natural extraction systems used: water, natural ethanol, super-critical carbon dioxide, authentic essential oil, and natural vegetable oils. No hydrocarbon, chlorinated, or halogenated solvents may be used. Propane,  N/A

13. If any other non-flavor ingredients/adjuvants are present in the flavor aside from those identified elsewhere on this form, are they primarily responsible for the hydrolysis  Attached  N/A

➤ List any preservative(s) used in this Natural Flavor:

N/A, no preservative(s) used.

If citric acid is used as a carrier, please complete the following:

- Is it produced via fermentation of carbohydrates? (NOP or COR)  Yes  No  N/A
- Is it from fruit and vegetable products? (COR)  Yes  No  N/A

**B. Genetically Modified Organism (GMOs)** may not be used at any stage in the process of making natural flavor products for use in products certified under the NOP, COR, (EC) No 889/2008, or LPO. Genetic engineering and excluded methods (i.e. methods used to produce GMOs) include a variety of methods used to genetically modify organisms or influence their growth and development by means that are not possible under natural conditions or processes and are not considered compatible with organic production. Such methods include but are not limited to cell fusion, microencapsulation, macroencapsulation, and recombinant DNA technology (including gene deletion, gene doubling, introduction of a foreign gene, and changing the positions of genes when achieved by recombinant DNA technology). Therefore, GMO plant extracts and natural flavors produced via GMO-microbial fermentations are not permitted.

➤ This natural flavor, including any solvents, carriers, preservatives or other processing aids used or contained therein, was produced and handled as applicable based on the response to A.1 above **without** the use of excluded methods (NOP), genetic engineering (Canada), and genetically modified organisms (EU and LPO), as defined at 7 CFR 205.2, CAN/CGSB 32.310-2015, Section 3.27, Directive 2001/18/EC, and Ley de Bioseguridad de Organismos Genéticamente Modificados, respectively.  Yes  No

**C. Ionizing Radiation** is prohibited for the treatment of organic products and inputs used to produce organic products. Other forms of radiation, including those used for food inspection, are permitted providing the uses meet applicable regulations that establish limitations pertaining to all (organic and non-organic) food products.

➤ This natural flavor has been handled **without** the use of ionizing radiation as described in 21 CFR 179.26(US), Canadian Food and Drug Regulations, Division 26, B.26.001(a-c)(Canada), Council Directive 96/29/Euratom (EU) or LPO Guidelines for the Organic Operation Article 4 (Mexico) as applicable based on the response to A.1 above?  Yes  No

**D. Nanotechnology** or technologies *intentionally* manipulating matter at atomic, molecular, or macromolecular dimensions typically between 1 and 100 nm to create materials, devices and systems with fundamentally new properties and functions, is prohibited for all uses and materials used in organic products. Naturally occurring nano-sized particles or those produced incidentally are permitted.

- *This natural flavor has been handed **without** the use of nanotechnology as described in NOP Policy Memo 15-2 (US), CAN/CGSB-32.310-2015(Canada), and/or LPO Guidelines for the Organic Operation Article 276, VI (Mexico) as applicable based on the response to A.1 above?*  **Yes**  **No**

**E. Commercial Availability** is the ability to obtain an input, in this case a natural flavor product, in an appropriate form, quality, or quantity to fulfill an essential function. Non-organic natural flavors may only be used in products with an “organic” label claim under the NOP when organic flavors are not commercially available.

- *Is this natural flavor commercially available in organic form?*  **Yes**  **No**  **Unknown**  **N/A – flavor is used in product certified under COR, European Commission (EC) No 889/2008, or LPO only.**

If **No**, provide specific details regarding how commercial availability has been assessed for this natural flavor and if the supplier intends to develop an organic alternative. Note that any information provided is intended to assist the operation using the natural flavor in demonstrating compliance with NOP commercial availability requirements.

**Commercial Availability Explanation:** An extensive review for the availability of this flavor ingredient as organic certified has been conducted and as a result of this review, it has been determined to the best of our knowledge that it is not available in the appropriate form, quality or quantity.

---

**To be Signed by a qualified technical person.**

---

Pursuant to applicable regulations, I, on behalf of the supplier, hereby attest that the information provided in this form is accurate and truthful to the best of my knowledge.

**Supplier (Company) Name:** Aurochemicals
