

Aurochemicals Standard Ingredient Form

This form facilitates the verification process for enrolled participants. The Non-GMO Project (NGP) Standard requires FoodChain ID to assess all potential GMO (*) risk ingredients, including highly processed ingredients and sub-ingredients. Detailed information from suppliers is required and highly appreciated. Thank you for your cooperation.

Name of Ingredient: LAURYL ALCOHOL, Natural	FEMA Number 2617	
Name of Ingredient Manufacturer: Aurochemicals		
1. Is this ingredient 95+% Certified Organic?	□Yes □No ☒ Organic	Compliant
2. Has this ingredient been verified as a product through	he Non-GMO Project Product Verification Progr	am?
	□Y€	es ⊠No
If you have answered YES to question 2, please answer questions, move to the end of this document and fill out to 2, please proceed to question 3.		
2.1 Please provide the Certificate of Verification for the N product/ingredient name on the certificate or listed i	<u> </u>	
2.2 Does a third party receive/handle the material before		′es □No
2.3 Does the third party handle the NGP verified product *Permeable form: handling of NGP verified.	•	∕es □ No
If you have answered question 2.3 yes, please provide SOI handling location.	's for segregation and traceability for the third-	party
3. Is the ingredient or any of its sub-ingredient and/or the ingredient genetically modified or derived using Biotechn		o- Yes ⊠No
4. Ingredient properties (check either box A or B, displaye ☑A. The ingredient consists of a single input ("m (e.g. flax seed): Select this optic contain (or is used to process) any additives (i.e. processing aids (enzymes, solvents, extractants, If you checked box A, please skip question 5.	nono"). Please identify the single raw material son only if this is a 100% single ingredient and do preservatives, carriers, anti-caking agents, etc.)	es not or
\square B. The ingredient contains multiple inputs ("comore than one input.	mpound"). Select this option if the ingredient of	ontains
5. In the table displayed below, list all of ingredient's raw fermentation media/substrates, and any other inputs tha		ocess.

Sub-Ingredient name Identify all inputs used in manufacturing of sub-ingredient(s) or indicate that sub-ingredient is 100% raw material is a processing aid²

Example: Sunflower Oil Example: 100% Sunflower seeds OR sunflower seeds, citric acid and vitamin E.

Additional rows needed and supplementary list is attached. (Please sign and date supplemental list.)

The following questions apply to the ingredient itself, and if a compound ingredient, to ALL its sub-ingredients and/or inputs used to produce its sub-ingredients, except micro processing aids. These should also be fully disclosed in the table above. Please answer the following questions for a proprietary formulation as well.

in the table above. Please answer the following questions for a proprietary formulation as well.		
6. Does this ingredient contain any processing aids ² which are present at 0.5% or more?	□Yes	⊠No
If yes, please name the processing aid(s)* below:		
* For purposes of the Non-GMO Project Standard, fermentation microorganisms are not considered processing aid	ls.	
7. Is this ingredient or its sub-ingredients made through a fermentation process (using a microorganic	sm)?	
	⊠Yes	\square No
7.1 If Yes, is the microorganism genetically modified?3	□Yes	⊠No
7.1.1 If Yes, is this ingredient separated out from the fermentation medium*? (*The microorganism used for fermentation grow in specially designed growth medium which supplies required for the growth of the microorganism, such a medium is called the Fermentation Medium)	⊠Yes the nutrie	_
8. Is this ingredient or any of its sub-ingredient a microorganism?	□Yes	⊠No
8.1 If Yes, is the microorganism genetically modified? ³	□Yes	□No
If you have answered Yes to question 8.1 please answer the following questions:		
8.2 Is the microorganism viable? ⁴	□Yes	□No
If No, please explain how is microorganism are rendered non-viable (list processes used):		
9. Is this ingredient or any of its sub-ingredients an enzyme?	□Yes	⊠No
Please list ingredient/sub-ingredient(s) and/or all inputs to which your response applies:		
· 		
9.1 If Yes, is the enzyme(s) derived from a genetically modified organism? ³	□Yes	□No
If you have answered 'Yes' to question 9.1 please answer the following question.		
9.2 Is the enzyme still functional ⁵ in the finished enrolled product?	□Yes	□No

If No, please explain how the enzyme is deactivated/denatured (i.e. briefly describe processes used to render the enzyme non-functional):

	radiant or its sub i	ngradiants including inputs	used to produce them, a product of syr	athetic highery
_		rcreated nucleic acid sequen		□Yes ⊠No
