

## **Aurochemicals Standard Ingredient Form**

This form facilitates the verification process for enrolled participants. The Non-GMO Project (NGP) Standard requires FoodChain ID to assess all potential GMO (\*) risk ingredients, including highly processed ingredients and sub-ingredients. Detailed information from suppliers is required and highly appreciated. Thank you for your cooperation.

| Name of Ingredient:   | 2-METHYL-3-FURANTHIOL, Natural  | FEMA Number 3188   |                                     |
|---|---|--|-------------------------------------|
| Name of Ingredient N  | Manufacturer: Aurochemicals   |  |                                     |
| 1. Is this ingredient 95+9  | % Certified Organic?  | □Yes □No ⊠ Org   | ganic Compliant                     |
| 2. Has this ingredient be   | een verified as a product through the Non-GM  | 10 Project Product Verification  | Program?                            |
|   |   |  | □Yes ⊠No                            |
| questions, move to the e<br>2, please proceed to que<br>2.1 Please provide the e  | Certificate of Verification for the NGP verified  | e section. If you have answered I product/ingredient with the  |                                     |
|   | name on the certificate or listed in an adden-<br>eceive/handle the material before received a  |  | □Yes □No                            |
| *Perm   | handle the NGP verified product in permeab<br>neable form: handling of NGP verified product<br>nestion 2.3 yes, please provide SOP's for segre  | t in unsealed form.  | □Yes □ No                           |
| =   | ny of its sub-ingredient and/or the source cro<br>nodified or derived using Biotechnology¹ meth   | -  | nt/sub-<br>□Yes ⊠No                 |
| ⊠ A. The ingred (e.g. flax seed) contain (or is upprocessing aids of the lift you checked in the lift | (check either box A or B, displayed below): dient consists of a single input ("mono"). Plea : Select this option only if th sed to process) any additives (i.e. preservativ s (enzymes, solvents, extractants, microorgan box A, please skip question 5.  dient contains multiple inputs ("compound"). input. | is is a 100% single ingredient ar<br>es, carriers, anti-caking agents,<br>isms, etc.) in its manufacturing | nd does not<br>etc.) or<br>process. |
| 5. In the table displayed   | below, list all of ingredient's raw materials, a betrates, and any other inputs that are used in  |  |                                     |

The Natural Choice for Flavor and Fragrance Ingredients

| Sub-Ingredient name       | Identify all inputs used in manufacturing of sub-ingredient(s) or indicate that sub-ingredient is 100% raw material | Please check if the sub-ingredient is a processing aid <sup>2</sup> |
|---------------------------|---|---|
| Example: Sunflower<br>Oil | Example: 100% Sunflower seeds OR sunflower seeds, citric acid and vitamin E.  |   |
|                           |   |   |
|                           |   |   |
|                           |   |   |
|                           |   |   |
|                           |   |   |
|                           |   |   |
|                           |   |   |
|                           |   |   |

Additional rows needed and supplementary list is attached. (Please sign and date supplemental list.)

The following questions apply to the ingredient itself, and if a compound ingredient, to ALL its sub-ingredients

| and/or inputs used to produce its sub-ingredients, except micro processing aids. These should also be in the table above. Please answer the following questions for a proprietary formulation as well.   | fully dis          | closea |
|--|--------------------|--------|
| 6. Does this ingredient contain any processing aids <sup>2</sup> which are present at 0.5% or more?  | □Yes               | ⊠No    |
| If yes, please name the processing aid(s)* below:  |                    |        |
| * For purposes of the Non-GMO Project Standard, fermentation microorganisms are not considered processing ai   | ds.                |        |
| 7. Is this ingredient or its sub-ingredients made through a fermentation process (using a microorganic   | ism)?<br>□Yes      | ⊠No    |
| 7.1 If Yes, is the microorganism genetically modified?3  | □Yes               | □No    |
| 7.1.1 If Yes, is this ingredient separated out from the fermentation medium*? (*The microorganism used for fermentation grow in specially designed growth medium which supplies required for the growth of the microorganism, such a medium is called the Fermentation Medium) | □Yes<br>the nutrie | _      |
| 8. Is this ingredient or any of its sub-ingredient a microorganism?  | □Yes               | ⊠No    |
| 8.1 If Yes, is the microorganism genetically modified? <sup>3</sup>  | □Yes               | □No    |
| If you have answered Yes to question 8.1 please answer the following questions:  |                    |        |
| 8.2 Is the microorganism viable? <sup>4</sup>  | □Yes               | □No    |
| If No, please explain how is microorganism are rendered non-viable (list processes used):  |                    |        |
| 9. Is this ingredient or any of its sub-ingredients an enzyme?   | □Yes               | ⊠No    |
| Please list ingredient/sub-ingredient(s) and/or all inputs to which your response applies:   |                    |        |
| 9.1 If Yes, is the enzyme(s) derived from a genetically modified organism? <sup>3</sup>  | □Yes               |        |
| If you have answered 'Yes' to question 9.1 please answer the following question.   |                    |        |
| 9.2 Is the enzyme still functional <sup>5</sup> in the finished enrolled product?  | □Yes               | □No    |

If No, please explain how the enzyme is deactivated/denatured (i.e. briefly describe processes used to render the enzyme non-functional):

| 10. Is this ingredient or its sub-ingredients, including inputs used to produce them, a product of syl   | ٠.                                     |
|--|--|
| (i.e. produced with synthetically created nucleic acid sequences and/or genes)?  | □Yes ⊠No                               |
| If Yes, please list all ingredient/sub-ingredient(s) and/or all inputs to which your response  | applies:                               |
| 11. Is this ingredient or its sub-ingredients, including inputs used to produce them, derived from a (e.g. dairy, meat, eggs, bee products, wool/hides, etc.)?                               | nimal sources<br>□Yes ⊠No              |
|  |  |
| If Yes:  |  |
| Answer the following for each animal-derived input (ingredient, sub-ingredient or any inp processing):   | uts used in                            |
| <ul> <li>Is rBGH, rBST (recombinant bovine growth hormone or recombinant bovine somatotropin<br/>the livestock?</li> </ul>   | ) administered to $\Box$ Yes $\Box$ No |
| <ul> <li>Are Animal husbandry practices involving cloned spermatozoa (cloned animals or their progress)</li> </ul>   | envlused?                              |
| - Are Animal husbandly practices involving cloned spermatozoa (cloned animals of their progr   | □Yes □No                               |
| • Are Bee products, viz. honey, bee pollen, etc., used?  | □Yes □No                               |
| If Yes, for additional information about requirements for bee products that contribute 0.5% or more to a finished enrol (discounting salt and water), request Annex III of this form.        | lled NGP product                       |
| 12. Is the ingredient or any sub-ingredients derived from alfalfa, canola, corn, cotton, papaya, potabeets, yellow summer squash, or zucchini? (Disclosure of this information is required.) | ato, soy, sugar<br>□Yes ⊠No            |
| If you selected Yes to questions 7, 8, 9, 10, 11 or 12, complete the following table for applicable ing  | gredient, sub-                         |

ingredients and/or inputs used to produce the sub-ingredient:
