

NATURAL FLAVOR QUESTIONNAIRE - NOP (US), COR (Canada), (EC) No 889/2008 (EU), LPO (Mexico)

	- (// - (-	,, (, ,,,	- (/				
for certification under t	leted for all non-organic natural he above noted organic stan needed to verify compliance.						
Natural Flavor Name and	Natural Flavor Name and FEMA Number on Technical Data Sheet:						
2,6-NONADIENOL 1% IN I	PG, Natural						
2780	2780						
Supplier Company Name	Supplier Company Name and Address: Aurochemicals, 7 Nicoll St, Washingtonville, NY 10992						
Type of flavor (select one	or more as necessary):						
Protein Hydrolysate	Extracts	Essential oil					
Compounded flavor	Oleoresin	☐ Isolate					
☐ Distillate	Compounded WONF	Other (Single Flavor Ch	emical)				
A. Natural Flavor Compliance Information							
1. Which regulatory body or regulation does the natural flavor and all its flavor constituents comply with?							
✓ FDA (US) ✓ CFIA	(Canada)		Alimentarius ion (Mexico)				
2. Can the material legally be labe	eled as a "natural flavor" per the ap	plicable regulatory body?	✓ Yes No				
3. Is the material only formulated	for flavoring purposes (no nutrition	al use or other functions)?	✓ Yes No				
produced using synthetic extra aids exclusive of CAN/CGSE using NOP or COR-suitable ex	use in NOP or COR "organic" or "m raction solvents (NOP) or non-ag 3-32.311-2015, Section 6.3-6.5 (Co ctraction materials* as applicable ba ion solvents are used.	ricultural extraction solvents OR). Is/are the natural flavor co	s and precipitation onstituent(s) made				

	If Yes , list solvent(s)/extraction material(s) used in the production of this Natural Flavor. If alcohol/ethanol is used, please indicate whether it is produced naturally (via fermentation):
	*Allowed natural extraction materials include water, natural ethanol, super-critical carbon dioxide, authentic essential oil, and natural vegetable oils. No hydrocarbon, chlorinated, or halogenated solvents may be used. Propane, hexane, triglycerides, and freon are examples of solvents that are prohibited.
5.	Natural flavors authorized for use in NOP or COR "organic" or "made with organic" (70-95%) products must not contain any synthetic carrier systems or any artificial preservatives exclusive of those included at 205.605 of the National List (NOP) and CAN/CGSB-32.311-2015, Section 6.3-6.5 (COR). Prohibited carrier systems and artificial preservatives include but are not limited to, propylene glycol, polyglycerol esters of fatty acids, mono-, di-, and tri-glycerides, benzoic acid, and polysorbate 80.
	➤ List any carrier system(s) used in this Natural Flavor: PROPYLENE GLYCOL
	N/A, no carrier system(s) used.
	☐ If maltodextrin is used as a carrier, please attach confirmation from the supplier or manufacturer that enzymes are primarily responsible for the hydrolysis ☐ Attached ☑ N/A
	➤ List any preservative(s) used in this Natural Flavor: N/A, no preservative(s) used.
	☐ If citric acid is used as a carrier, please complete the following:
	■ Is it produced via fermentation of carbohydrates? (NOP or COR) Yes No V/A
	- Is it from fruit and vegetable products? (COR) ☐ Yes ☐ No ☑ N/A
	If glycerin is used as a carrier or solvent, please provide its organic certificate or a completed QAI Non-Organic Material Compliance Questionnaire to detail its manufacturing process. ☐ Attached ✓ N/A ☐ Alternatively, if this Natural Flavor is to be used in a product certified under COR , is the glycerin from vegetable or animal fats and/or oils and produced using fermentation or hydrolysis? ☐ Yes ☐ No ✓ N/A
6.	If this natural flavor consists of a natural flavoring agent that must be declared by its common or usual name on the product label, list the agent here:
7.	List all non-flavor ingredients/adjuvants and detail the function they serve in the flavor.

		Non-Flavor Ingredient/Adjuvant	Function in the Flavor		
		N/A, no other non-flavor ingredients/adjuvants are where on this form.	present in the flavor aside from those identified		
8.	Do the flavoring agent(s) in this material only consist of substances that do not impart a specific characteristic flavorings with modifying properties? For example, if the only flavoring agent in the material is Luo Han G (Monk Fruit) derived products, Thaumatin, Glycosylated Steviol Glycosides, or similar the response should be Ye Yes No				
	If Yes , attach documentation detailing the maximum usage rate for the overall flavor material to qualify as a natural flavor: Attached. V/A				
	prod excl orga prod cell gene DNA	ducts for use in products certified under the NOP, COR uded methods (i.e methods used to produce GMOs) in anisms or influence their growth and development by messes and are not considered compatible with organic fusion, microencapsulation, macroencapsulation, and redoubling, introduction of a foreign gene, and changin	clude a variety of methods used to genetically modify		
	t e	This natural flavor, including any solvents, carriers, pre rherein, was produced and handled as applicable base excluded methods (NOP), genetic engineering (Canada as defined at 7 CFR 205.2, CAN/CGSB 32.310-2015, S	d on the response to A.1 above <u>without</u> the use of a), and genetically modified organisms (EU and LPO),		
	E	Bioseguridad de Organismos Genéticamente Modificad	dos, respectively. Yes No		
	prod appl	licable regulations that establish limitations pertaining t This natural flavor has been handed <u>without</u> the use o	food inspection, are permitted providing the uses meet o all (organic and non-organic) food products. fionizing radiation as described in 21 CFR 179.26(US),		
	(Canadian Food and Drug Regulations, Division 26, B.2 ŒU) or LPO Guidelines for the Organic Operation Artic A.1 above? ☑ Yes ☐ No			

 D. Nanotechnology or technologies intentionally manipulating matter at atomic, molecular, or macromolecular dimensions typically between 1 and 100 nm to create materials, devices and systems with fundamentally new properties and functions, is prohibited for all uses and materials used in organic products. Naturally occurring nanosized particles or those produced incidentally are permitted. ➤ This natural flavor has been handed without the use of nanotechnology as described in NOP Policy Memo 15-2 (US), CAN/CGSB-32.310-2015(Canada), and/or LPO Guidelines for the Organic Operation Article 276, VI (Mexico) as applicable based on the response to A.1 above? 				
E. Commercial Availability is the ability to obtain an input, in this case a natural flavor product, in an appropriate form, quality, or quantity to fulfill an essential function. Non-organic natural flavors may only be used in products with an "organic" label claim when organic flavors are not commercially available.				
Does your operation offer this natural flavor in an equivalent certified organic form? Yes No No N/A – flavor is used in product certified under European Commission (EC) No 889/2008 or LPO only.				
To be Signed by a qualified technical person.				
Pursuant to applicable regulations, I, on behalf of the supplier, hereby attest that the information provided in this form is accurate and truthful to the best of my knowledge.
