

NATURAL FLAVOR QUESTIONNAIRE - NOP (US), COR (Canada), (EC) No 889/2008 (EU), LPO (Mexico)

This form must be completed for all non-organic natural flavors used in products requested for certification under the above noted organic standards. <u>Note that QAI may request</u> additional information as needed to verify compliance.

	additional information as needed to verify compliance.					
	Natural Flavor Name and FEMA Number on Technical Data Sheet:					
	DAVANA OIL, Natural					
	2359					
	Supplier Company Name and Address: Aurochemicals, 7 Nicoll St, Washingtonville, NY 10992					
	Type of flavor (select one	or more as necessary):				
	Protein Hydrolysate	☐ Extracts	Essential oil			
	Compounded flavor	Oleoresin	☐ Isolate			
✓	Distillate	Compounded WONF	Other (Single I	Flavor Chemical)		
A. Natural Flavor Compliance Information 1. Which regulatory body or regulation does the natural flavor and all its flavor constituents comply with? FDA (US) CFIA (Canada) European Commission (EU) Codex Alimentarius Commission (Mexico)						
 2. Can the material legally be labeled as a "natural flavor" per the applicable regulatory body?						
pr ai	roduced using synthetic extra ids exclusive of CAN/CGSB- sing NOP or COR-suitable ext	se in NOP or COR "organic" or "ma action solvents (NOP) or non-agr 32.311-2015, Section 6.3-6.5 (CO raction materials* as applicable ba on solvents are used.	ricultural extractio PR). Is/are the natur	n solvents and precipitation ral flavor constituent(s) made		

	If Yes , list solvent(s)/extraction material(s) used in the production of this Natural Flavor. If alcohol/ethanol is used, please indicate whether it is produced naturally (via fermentation):
	*Allowed natural extraction materials include water, natural ethanol, super-critical carbon dioxide, authentic essential oil, and natural vegetable oils. No hydrocarbon, chlorinated, or halogenated solvents may be used. Propane, hexane, triglycerides, and freon are examples of solvents that are prohibited.
5.	Natural flavors authorized for use in NOP or COR "organic" or "made with organic" (70-95%) products must not contain any synthetic carrier systems or any artificial preservatives exclusive of those included at 205.605 of the National List (NOP) and CAN/CGSB-32.311-2015, Section 6.3-6.5 (COR). Prohibited carrier systems and artificial preservatives include but are not limited to, propylene glycol, polyglycerol esters of fatty acids, mono-, di-, and tri-glycerides, benzoic acid, and polysorbate 80.
	➤ List any carrier system(s) used in this Natural Flavor:
	✓ N/A, no carrier system(s) used.
	☐ If maltodextrin is used as a carrier, please attach confirmation from the supplier or manufacturer that enzymes are primarily responsible for the hydrolysis ☐ Attached ☑ N/A
	➤ List any preservative(s) used in this Natural Flavor:
	✓ N/A, no preservative(s) used.
	☐ If citric acid is used as a carrier, please complete the following:
	■ Is it produced via fermentation of carbohydrates? (NOP or COR) Yes No V/A
	■ Is it from fruit and vegetable products? (COR)
	If glycerin is used as a carrier or solvent, please provide its organic certificate or a completed QAI Non-Organic Material Compliance Questionnaire to detail its manufacturing process. Attached N/A
	□ Alternatively, if this Natural Flavor is to be used in a product certified under COR , is the glycerin from vegetable or animal fats and/or oils and produced using fermentation or hydrolysis? ☐ Yes ☐ No ☑ N/A
6.	If this natural flavor consists of a natural flavoring agent that must be declared by its common or usual name on the product label, list the agent here:
7.	List all non-flavor ingredients/adjuvants and detail the function they serve in the flavor.

	Non-Flavor Ingredient/Adjuvant	Function in the Flavor
	N/A, no other non-flavor ingredients/adjuvants are sewhere on this form.	present in the flavor aside from those identified
su	ch as flavorings with modifying properties? For example	bstances that do not impart a specific characteristic flavor , if the only flavoring agent in the material is Luo Han Guo teviol Glycosides, or similar the response should be Yes .
	Yes , attach documentation detailing the maximum usage vor:	e rate for the overall flavor material to qualify as a natural
pro ex oro pro ce ge DN	oducts for use in products certified under the NOP, COR cluded methods (i.e methods used to produce GMOs) in ganisms or influence their growth and development by mocesses and are not considered compatible with organical fusion, microencapsulation, macroencapsulation, and modeling, introduction of a foreign gene, and changing	nclude a variety of methods used to genetically modify neans that are not possible under natural conditions or production. Such methods include but are not limited to
>	This natural flavor, including any solvents, carriers, pre therein, was produced and handled as applicable base excluded methods (NOP), genetic engineering (Canada as defined at 7 CFR 205.2, CAN/CGSB 32.310-2015, S Bioseguridad de Organismos Genéticamente Modificad	d on the response to A.1 above <u>without</u> the use of a), and genetically modified organisms (EU and LPO), Section 3.27, Directive 2001/18/EC, and Ley de
pro ap	Ionizing Radiation is prohibited for the treatment of orgoducts. Other forms of radiation, including those used for plicable regulations that establish limitations pertaining the This natural flavor has been handed without the use of Canadian Food and Drug Regulations, Division 26, B.2 (EU) or LPO Guidelines for the Organic Operation Articles A.1 above? Yes No	r food inspection, are permitted providing the uses meet to all (organic and non-organic) food products. f ionizing radiation as described in 21 CFR 179.26(US), 16.001(a-c)(Canada), Council Directive 96/29/Euratom

D. Nanotechnology or technologies <i>intentionally</i> manipulating matter at atomic, molecular, or macromolecular dimensions typically between 1 and 100 nm to create materials, devices and systems with fundamentally new properties and functions, is prohibited for all uses and materials used in organic products. Naturally occurring nan sized particles or those produced incidentally are permitted.
➤ This natural flavor has been handed <u>without</u> the use of nanotechnology as described in NOP Policy Memo 1: 2 (US), CAN/CGSB-32.310-2015(Canada), and/or LPO Guidelines for the Organic Operation Article 276, VI
(Mexico) as applicable based on the response to A.1 above?
E. Commercial Availability is the ability to obtain an input, in this case a natural flavor product, in an appropriate form, quality, or quantity to fulfill an essential function. Non-organic natural flavors may only be used in products with an "organic" label claim when organic flavors are not commercially available.
Does your operation offer this natural flavor in an equivalent certified organic form? ☐ Yes ☒ No ☐ N/A − flavor is used in product certified under European Commission (EC) No 889/2008 or LPO only.
To be Signed by a qualified technical person.
Pursuant to applicable regulations, I, on behalf of the supplier, hereby attest that the information provided in this form is accurate and truthful to the best of my knowledge.
