Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Control parameters Contains no substances with occupational exposure limit values

8.2 Exposure Controls
 Appropriate Engineering Controls
 Handle in accordance with good industrial hygiene and safety practices. Wash hands before breaks and at the end of the workday.

 Personal protective equipment
 These recommendations are advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situations of anticipated use

	by our customers. They should not be construed as offering an approval or any specific use scenario.
Eye/face protection	Safety glasses. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166 (EU).
Skin protection	Wear chemically resistant gloves. Use proper glove removal techniques (without touching gloves outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use. Wash and dry hands.
Body protection	Complete suit protecting against chemicals should be selected specifically for the work place, depending on concentration and quantity of the hazardous substances handled. The resistance of the protective clothing to chemicals should be ascertained with the respective supplier
Respiratory protection	Where risk assessment shows air purifying respirators are appropriate use a full faced respirator with multi -purpose combination (US) or type ABEK (EN14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU)
Control of environmental exposure	Do not let product enter drains.
