

Aurochemicals Standard Ingredient Form

This form facilitates the verification process for enrolled participants. The Non-GMO Project (NGP) Standard requires FoodChain ID to assess all potential GMO (*) risk ingredients, including highly processed ingredients and sub-ingredients. Detailed information from suppliers is required and highly appreciated. Thank you for your cooperation.

| Name of Ingredient: BENZYL PHENYL ACETATE, NA | TURAL (Export) |
|--|---|
| Name of Ingredient Manufacturer:A | urochemicals |
| 1. Is this ingredient 95+% Certified Organic? | \square Yes \square No \boxtimes Organic Compliant |
| 2. Has this ingredient been verified as a product through | :he Non-GMO Project Product Verification Program? |
| | □Yes ⊠No |
| If you have answered YES to question 2, please answer questions, move to the end of this document and fill out to 2, please proceed to question 3. | |
| 2.1 Please provide the Certificate of Verification for the N product/ingredient name on the certificate or listed i | |
| 2.2 Does a third party receive/handle the material before | |
| 2.3 Does the third party handle the NGP verified product *Permeable form: handling of NGP verified | • |
| If you have answered question 2.3 yes, please provide SOI handling location. | Y's for segregation and traceability for the third-party |
| 3. Is the ingredient or any of its sub-ingredient and/or the ingredient genetically modified or derived using Biotechn | |
| (e.g. flax seed): Select this optic contain (or is used to process) any additives (i.e. | d below): nono"). Please identify the single raw material source on only if this is a 100% single ingredient and does not preservatives, carriers, anti-caking agents, etc.) or microorganisms, etc.) in its manufacturing process. |
| \square B. The ingredient contains multiple inputs ("comore than one input. | ompound"). Select this option if the ingredient contains |
| 5. In the table displayed below, list all of ingredient's raw fermentation media/substrates, and any other inputs tha | |

and Fragrance Ingredients Sub-Ingredient Identify all inputs used in manufacturing of sub-ingredient(s) or indicate that Please check if the sub-ingredient sub-ingredient is 100% raw material is a processing aid² name Example: Sunflower Example: 100% Sunflower seeds OR sunflower seeds, citric acid and vitamin E.

Additional rows needed and supplementary list is attached. (Please sign and date supplemental list.)

The following questions apply to the ingredient itself, and if a compound ingredient, to ALL its sub-ingredients d/or inputs used to produce its sub-ingredients, except micro processing aids. These should also be fully disclosed

| in the table above. Please answer the following questions for a proprietary formulation as well. | fully disc | closed |
|--|--------------------|---------|
| 6. Does this ingredient contain any processing aids ² which are present at 0.5% or more? | □Yes | ⊠No |
| If yes, please name the processing aid(s)* below: | | |
| * For purposes of the Non-GMO Project Standard, fermentation microorganisms are not considered processing aid | ds. | |
| 7. Is this ingredient or its sub-ingredients made through a fermentation process (using a microorganic | sm)? ⊠Yes | □No |
| 7.1 If Yes, is the microorganism genetically modified?3 | □Yes | ⊠No |
| 7.1.1 If Yes, is this ingredient separated out from the fermentation medium*? (*The microorganism used for fermentation grow in specially designed growth medium which supplies required for the growth of the microorganism, such a medium is called the Fermentation Medium) | ⊠Yes the nutrie | _ |
| 8. Is this ingredient or any of its sub-ingredient a microorganism? | □Yes | ⊠No |
| 8.1 If Yes, is the microorganism genetically modified? ³ | □Yes | □No |
| If you have answered Yes to question 8.1 please answer the following questions: | | |
| 8.2 Is the microorganism viable? ⁴ | □Yes | □No |
| If No, please explain how is microorganism are rendered non-viable (list processes used): | | |
| 9. Is this ingredient or any of its sub-ingredients an enzyme? | □Yes | ⊠No |
| Please list ingredient/sub-ingredient(s) and/or all inputs to which your response applies: | | |
| 9.1 If Yes, is the enzyme(s) derived from a genetically modified organism? ³ | □Yes | □No |
| If you have answered 'Yes' to question 9.1 please answer the following question. | | |
| 9.2. Is the enzyme still functional ⁵ in the finished enrolled product? | □Yes | □No |

If No, please explain how the enzyme is deactivated/denatured (i.e. briefly describe processes used to render the enzyme non-functional):

| | · | <u>-</u> | | |
|-------------------|--|--|---|--------------------------|
| _ | • | | used to produce them, a product of synth | <u>.</u> |
| (i.e. produce | d with synthetically | rcreated nucleic acid sequen | nces and/or genes)? | □Yes ⊠No |
| If Ye | es, please list all ing | redient/sub-ingredient(s) an | d/or all inputs to which your response ap | oplies: |
| _ | | | used to produce them, derived from anin | |
| (e.g. dairy, m | ieat, eggs, bee prod | ducts, wool/hides, etc.)? | | □Yes ⊠No |
| If Ye | ?s: | | | |
