|                         |   |
|-------------------------|---|
| General Advice          | Consult a physician. Show this safety data sheet to the doctor in attendance. Move out of dangerous area.       |
| Inhalation              | If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician. |
| Contact with skin:      | Remove contaminated clothing. Rinse skin with cool water then wash with mild soap and warm water.               |
| Contact with eyes:      | Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.                          |
| Ingestion               | DO NOT induce vomiting. Never give anything by mouth to an unconscious person. Rinse mouth with water.          |
| Clothing contamination: | Remove contaminated clothing and wash before reuse.   |

|-----------|---------|-------|--------------------|--|
| Ethanol   | 64-17-5 | TWA   | 1000 ppm           | USA, ACGIH Threshold Limit Value (TLV) |

## 8.2 Exposure Controls

Appropriate Engineering Controls Handle in accordance with good industrial hygiene and safety practices. Wash hands before breaks and at the end of the workday.

### Personal protective equipment

**These recommendations are advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situations of anticipated use by our customers. They should not be construed as offering an approval or any specific use scenario.**

|                                   |  |
|-----------------------------------|--|
| Eye/face protection               | Face shield and safety glasses Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).   |
| Skin protection                   | Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.   |
| Body protection                   | Impervious clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.   |
| Respiratory protection            | Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multipurpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU). |
| Control of environmental exposure | Prevent further leakage or spillage if safe to do so. Do not let product enter drains.   |
